# **SAFETY ALERT**

## **ROAD CONDITIONS**

**Rain is predicted in the current weather forecast and I can guarantee a lot of people will be happy about this. However after the long dry spell we have had, a bit of rain could cause some problems on the road with summer ice so please be careful and follow these tips:**

- Keep speeds down on wet roads after a long dry period
- Take extra care on curves
- Increase following distance from vehicles in front of you
- Brake and steer gently
- Allow extra travel time.

**If you rush to work you may only end up saving a minute or two. You could loose far more if you have an incident on the road.  
So please drive safely and arrive to work in one piece!**
